

Dear Hiring Team,

I am thrilled to apply for the AI/ML & Generative AI Engineer position at Infosys. My background in designing RAG-based LLM systems, vector retrieval pipeline development, and scalable ML workflow development is a direct fit for your emphasis on agentic AI architectures and cloud-native AI solutions.

I have developed end-to-end ML solutions for training, validation, deployment, and monitoring, with seamless CI/CD pipeline integration and containerized runtime environments. My experience in LLM-based retrieval system development and modular orchestration framework development is indicative of my ability to develop scalable and enterprise-grade AI solutions, which Infosys provides to its global clientele.

I am eager to leverage my skills to develop highly impactful AI solutions in the Banking and Finance domain, where high reliability, interpretability, and scalability are paramount.

I look forward to being a part of Infosys's next-generation AI initiatives.

Sincerely,

Keerthana Belthur Parthasarathy
